My Guiding Philosophy

Hinduism is the greatest religion ever because it is both democratic and based on free will. It is democratic since it is accepting, tolerant and respectful of all faiths and it is of free will since it allows one to imagine God the way one perceives Him. If that isn't great I don't know what is.

Our current president and the EC team are administering our temple with honesty, openness, transparency, sense of unity, cooperation and fairness. I and several other nominees believe and subscribe to this philosophy and will strive to promote these values to the highest degree.

Regardless of what position I am offered or take, I will:

- See myself as a servant of the temple.
- Service to our devotees will be my highest cause and priority. All else are next in line.
- Promote ownership of our temple activities among our devotees.
- Will endeavor to achieve all- community participation.
- Will make my physical presence often in the temple premises.
- All meetings I chair will be open and held under sunshine.
- I will create a Professional working environment.
- Will bring my talents into the team but work as a cooperative team member
- Regardless whether or not I am elected or seated in the GC, I will continue to volunteer at HSCF.

Together we win
